Technical Solutions Consultant & Full-Stack Innovator in [manuel-orellana-41538012](#)

Professional Summary

Innovative, forward-thinking Technology Specialist and Solutions Consultant with over 25 years of cross-functional excellence in enterprise technical engineering, systems optimization, and client enablement. Expert in bridging the gap between intricate hardware architectures and agile software solutions. A passion-driven tech evangelist with deep competencies in Full-Stack Web Development and Applied Artificial Intelligence. Recognized for an outside-the-box engineering mindset, specializing in developing custom software applications to streamline operational deficiencies, optimize high-stakes sales pipelines, and solve real-world logistical bottlenecks. Bilingual communicator dedicated to aligning cutting-edge technology with high-impact corporate revenue objectives.

Key Accomplishments

\$100,000+ **Operational Savings:** Negotiated structural wireless service contract terms saving the organization over \$100K over a 3-year term.

\$50,000/yr **Licensing Recovery:** Successfully migrated over 400 corporate endpoints from Workspace ONE over to Microsoft Intune within a record-setting 13-day window, immediately reducing annual software overhead.

200+ Hours **Latency Elimination:** Deployed and fully optimized Apple Business Manager protocols, completely automating configuration sequences and saving extensive engineering labor hours.

Awarded **President's Award Recipient:** Honored with the prestigious Canon Americas President Award and multiple Canon Canada President Awards for deployment and technical execution excellence.

Technical Projects & Innovation

Continuous **Enterprise Sales & Logistics Opportunity CRM, *Independent Software Initiative***

- **UI/UX Variable Architecture:** Built a production-ready, clean frontend application leveraging modularized native CSS variables, flexbox structures, and dynamic grid layouts to manage localized account data pipelines.
- **Asynchronous State Management:** Designed functional state preservation bindings to automatically sync local storage states and refresh dashboard layouts dynamically upon tracking events.
- **Dynamic Animations:** Integrated real-time interaction feedback loops utilizing CSS3 keyframe pulse triggers to flag aging accounts and lifecycle constraints.
- **Data Handling & Fallbacks:** Developed structured JSON file-system importers and string execution pipelines using vanilla HTML5 FileReader APIs to safeguard cross-system data updates without external server overhead.

Continuous **Applied AI & Automated Workflow Engineering, *Self-Directed Portfolio Integration***

- **Prompt Engineering & Logic Automation:** Investigate and build localized automation scripts combining Large Language Model capabilities with operational flows to parse data structures, optimize manual categorization, and eliminate administrative latency.
- **Outside-the-Box Solutions:** Combine modern frontend web paradigms with custom algorithmic automation models to create performant, cost-free technical alternatives that solve real-world industry friction points.

Work History

- 03/2023 – **Technical Solutions Consultant (Sales Enablement)**, *Canon Canada Inc.*, Brampton, ON
- Present
- **Subject Matter Expert (SME):** Serve as the principal technical authority, structural integration engineer, and platform advisor across three high-value corporate portfolios: Enterprise Business Printers (imageFORCE series), Document Scanners (imageFORMULA line), and Advanced ID Card & Badge issuance terminals (IX-R7000, CX-G2400, CX-G6400).
 - **Sales Acceleration & Enablement:** Partner closely with dealer channel networks and Sales Enablement units to audit prospective client environments, analyze complex document workflows, and propose tailored technology configurations that remove runtime latency and drive strategic asset sales.
 - **Advanced Systems Integration:** Dissect technical firmware frameworks and cross-platform operating environments to discover hidden competitive product advantages, orchestrate complex active enterprise integrations, and deliver definitive proof-of-concept demonstrations.
 - **Tier-3 Technical Operations:** Solve mission-critical data processing or hardware interoperability faults for enterprise tier-1 clients under active contractual validation timelines.
 - **Global Feedback Loop:** Consolidate field telemetry data, user observations, and real-world software/hardware interaction roadblocks to deliver structured engineering enhancements directly to global product development teams.
- 08/2009 – **Client Technology Specialist**, *Canon Canada Inc.*, Toronto, ON
- 02/2023
- **Executive Tier Technical Support:** Commanded dedicated technical hardware and software operations across the corporate layout, delivering immediate, zero-downtime solutions to C-suite executives and enterprise leadership.
 - **Enterprise Mobility Management (EMM):** Acted as the core platform owner for secure configuration, global provisioning, and continuous deployment of over 400 enterprise assets leveraging Microsoft Intune and VMware Workspace ONE. Implemented app-based compliance policies that dramatically lowered corporate data expenses.
 - **Multisite Infrastructure Operations:** Commanded infrastructure lifecycle support and continuous operational availability across 3 critical national distribution warehouses, keeping PC hardware, operating standards, and mobile terminal scanners online.
 - **Knowledge Management Architecture:** Researched, authored, and maintained a centralized technical knowledgebase used internally by enterprise IT and externally by third-party support networks in the United States.
 - **Resource Optimization:** Deployed creative hardware modifications and technical configuration adjustments to address recurring environment alerts, driving cost reductions without dropping performance metrics. Managed end-user expectations via the HP Project Portfolio Management Center (PPM) ticketing architecture.
- 09/2005 – **Training & Knowledge Management Specialist**, *Siemens Business Services*, Mississauga, ON
- 06/2009
- **Onboarding Curriculums:** Designed, iterated, and adapted agile training frameworks to rapidly transform fresh talent into high-performing professionals in high-velocity service desk environments.
 - **International Operations Prototyping:** Chosen to head corporate operations scaling into the Philippines, directing on-site training pipelines for 50 international technical staff on core account processes and platform environments.
 - **Technical Content Engineering:** Engineered comprehensive training documentation, operational playbooks, and systems layouts covering Active Directory user management, complex secure VPN tunnels, and enterprise communication suites.
- 09/2006 – **Incident Management Specialist**, *Siemens Business Services*, Mississauga, ON
- 09/2007
- **High-Volume Incident Triage:** Oversaw the automated triage, business impact assessment, validation, and redirection of hundreds of incoming infrastructure requests submitted daily by Level 1 agents.
 - **Global Response Coordination:** Served as the operational integration bridge linking the central technical desk with remote hardware support engineering units operating throughout the US, UK, Belgium, Germany, Spain, Italy, and Ireland.
 - **Root-Cause Analytics (RCA):** Extracted historical incident data sets from resolved outages to conduct deep technical trend analyses, identifying core infrastructural single points of failure to prevent duplicate tickets.

Expertise Matrix

Hardware	Enterprise Printers (imageFORCE), Enterprise Scanners (imageFORMULA), IX-R7000 Platform, CX-G2400, CX-G6400, Mobile Scanner Terminals
SME	

Web stack HTML5, CSS3 (Grid/Flexbox), JavaScript (ES6+), JSON, DOM API, Local Storage APIs
EMM & Microsoft Intune, Workspace ONE, Apple Business Manager (ABM), Active Directory, Azure
Security AD / Entra ID, Identity & Access Management
Virtual & TCP/IP, VPN Gateway Client Topologies, VMware Workstation, Oracle VirtualBox, WMS
Network Systems, AS/400 Basics, HP PPM Architecture

Certifications

IT Service ITIL Foundations 4 (Issued September 2020)

Education

Network Engineering Studies, *Xintra Computer College*, Mississauga, ON

High School Diploma, *Michael Power St. Joseph HS*, Toronto, ON

Languages

English **English** (Fluent)

Spanish **Spanish** (Fluent)
